- Radio broadcasting status

From the Big-Picture to a Focus

Are you looking to take another step in God's call on your life to minister to unreached peoples? Maybe you have no idea where to begin. Joshua Project offers a new tool to help you narrow the big-picture of thousands of unreached peoples down to a few that are of particular interest to you. This new tool is available at: <http://www.joshuaproject.net/filter.php>

This tool selects unreached peoples based on your interests. Now you can ask questions like: "What are all the unreached Hindu people groups in the 10/40 Window larger than 5,000,000?" or "Which Buddhist people groups in China have no Scripture portions and are considered unreached?" or "Which Muslim people groups in Northeast Asia have a complete Bible and the Jesus film available?" Click "Submit" and you will see a list of people groups matching your criteria. Click on any people name in

Display this on your website ↓

Unreached People of the Day

Please pray for the ...

Kahar of India

Population: 7,086,000

the results list and you will see a profile of that group. To help you get started there are a set of pre-made queries at: www.joshuaproject.net/filtermade.php

"Unreached People of the Day" Web Feed

Are you interested in accelerating prayer for unreached peoples? How about adding the new "Unreached

People Group of the Day" feed to your website or blog? Each day a different unreached people group photo and basic statistics similar to the one at the left can be displayed on your website. With a few very simple steps, this feed can be displayed on most any website. Once you add this to a website you don't need to do anything else and a daily changing unreached peoples profile will be displayed on your site. Already many dozens of individuals, churches and agencies are using this feed on their websites to encourage prayer for unreached peoples. For instructions on how to display the 'Unreached People of the Day' on your website and samples of sites using the feed see: www.joshuaproject.net/upgotdfeed.php If you know a little about CSS, using a custom feed, you can even change the colors, fonts and styles of this feed to match your website. Please see the above webpage or contact Joshua Project at info@joshuaproject.net if you would like more information.
